

Ergonomic Handling Systems

Benefit from our European Solutions Center to develop your projects

Offering full-service capabilities tailored to our customers' needs:

Ingersoll Rand Custom Project

- 1. Project Review
- 2. Feasibility Study
- 3. Concept Design
- 4. System Design
- 5. Engineering Complete
- 6. Build Complete
- 7. Installation Phase
- 8. Commissioning Phase
- 9. Project Complete

Engineering

- Feasibility study
- Concept design
- Simulation
- System design
- 2D and 3D CAD

Project management

- Dedicated project manager
- Project planning
- Coordination
- Execution

Service

- Installation and start-up support
- Training
- Preventive maintenance
- Calibration and repair service
- Technical support

Providing turnkey, customized solutions that improve our customers' productivity and efficiency:

Custom Ergonomic Handling Systems

Custom Multi-Spindle Fastening Systems

Custom Solution Process

From RFQ → To Installation

Contents

The rising importance of ergonomics

Ergonomics (literally, the science of work) is the key to designing a better workplace, where tool, task and operator come together with a minimum of stress. A minimum of stress on the worker leads to a maximum level of quality production...

Since 1959, Ingersoll Rand has been at the forefront of developing ergonomic solutions for lifting, manipulating, and transferring loads by offering a complete line of products designed to maximize productivity while simultaneously minimizing operator fatigue and discomfort. No matter what your requirement, Ingersoll Rand offers the products for you to do your job effectively, efficiently, and above all, safely. By choosing Ingersoll Rand, you are receiving 50 years of innovation and product expertise that is unrivalled anywhere else.

Selection Guide

Three building blocks to a complete ergonomic handling solution

OVERHEAD SUPPORTS

Ceiling-supported workstations crane and monorails (page 7)

- Capacities up to 1360 kg
- For use when there is limited floor space and adequate ceiling structure to support the load
- Capable of mounting parallel or perpendicular to overhead support steel
- Provides rectangular coverage for a single workstation, or an entire assembly line with multiple bridge cranes

- Provides simple single-axis transfer
- Curved sections available for monorail systems

LIFTING / BALANCING DEVICES

Pneumatic balancers (page 20)

- Capacities up to 450 kg
- Allows user to move load via up / down controls then float mode allows for precision manual movement and placement of the load without having the “jogging” associated with air and electric hoists
- Energy savings — less air consumption than an air hoist
- Used in applications where precision spotting is necessary
- Offers up to 3 m travel

Intelift® balancer (page 24)

- Capacities up to 450 kg
- IntelIFT® removes the need for up / down switches and allows for completely manual operation by sensing user force input and translating it to precise lifting / lowering
- Features float mode throughout entire range of motion
- Used in applications where:
 - Precision spotting is necessary
 - Hands-on control of load is required / beneficial
 - One hand operation is beneficial

HANDLING DEVICES

Hook (page 41)

- Used in applications where:
 - Simple pick and place
 - Straight transfer with no part manipulation
 - Hook access is readily available
 - Odd-shaped parts

Probe (page 40)

- Used in applications where:
 - Part is cylindrical with an accessible hole in the core
 - Straight transfer or manipulation of parts
 - Typical parts include rolls and machined parts

Trap (page 41)

- Used in applications where:
 - Simple pick and place
 - Straight transfer with no part manipulation
 - Accessible grab locations on both sides of part

Jib cranes (page 15)

- Capacities up to 860 kg
- 360 degrees of circular coverage area
- Available with up to 4.25 m (3.65 m standard) boom underclearance
- Floor and wall mounting options
- Standard and low profile configurations
- Useful for short transfer applications less than 6m

Spring balancers (page 28)

- Capacities up to 180 kg
- Lifts ranging from 1.6 m to 3 m
- Used in applications where:
 - Loads travel a relatively short distance
 - One tool is used repeatedly in a limited area of motion, such as assembly stations
 - Single load balancing is required (weld guns, assembly fixtures, etc.)

Arms (page 31)

- Capacities up to 450 kg
- Great for reaching in, under, and around obstacles to precisely and effortlessly position loads
- Column or overhead mounting options
- Available in three styles: articulating, parallel link, and vertical mast
- Up to 3 m of horizontal reach

Torque tube (page 42)

- Capacities up to 68 kg
- Vertical travel range of up to 914 mm
- Rigidity of the system minimizes inertia when moving loads into place along a rail system
- Useful with lifting offset loads where the weight of the load is disproportionate to the center of gravity
- Provides torque reaction for fastening systems

Vacuum (page 38)

- Used in applications where:
 - Smooth non-porous surface is available
 - Straight transfer or manipulation of parts
 - Typical materials include glass, sheet metal and cardboard

Clam (page 39)

- Used in applications where:
 - Part is rigid with accessible clamping surfaces
 - Straight transfer or manipulation of parts
 - Typical parts include machined parts, bundles, fabricated metal parts

Rail Systems

The backbone of any ergonomic material handling system

Ingersoll Rand offers:

- ▶ Ceiling-supported workstation bridge cranes
- ▶ Monorails

Ceiling-supported workstations cranes

Ideal for high-volume production environments with limited floor space.

Capable of mounting parallel or perpendicular to overhead support steel.

Provide rectangular coverage for a single workstation, or an entire assembly line with multiple bridge cranes.

Capacities up to 1400 kg.

Safety first

Ingersoll Rand's primary and vital concern is safety.

Safety factor: all components are rated at a 5 to 1 safety factor based on meticulous tests performed at independent testing laboratories.

Deflection: Ingersoll Rand rail is designed to not exceed 1/450 of span, in accordance with ANSI B30.11 Monorail and Underhung Cranes.

Safety cables: we require the use of safety cables at all moving (hanger and end-truck) suspension points.

Redundant end stops: available for extra safety.

Load ratings: clearly marked on both sides of bridges rails.

Facilitates quick, precision positioning

Thanks to the quality of the rolling surfaces, the guidance of the trolleys and the articulated suspensions, Ingersoll Rand systems allow you to move loads with a maximum starting force of 1.5 % of the total load (bridge plus load). Furthermore, the rolling effort required during displacement is less than 1 % – even if the load is pushed far away from the centre of the bridge (see sketches).

Pushing force in the centre
Rolling effort less than 0.5 kg for a load of 100 kg

Pushing force on one side
Rolling effort less than 1 kg for a load of 100 kg

Starting ►►►► Moving ►►►► Positioning

Typical enclosed rail systems

Ingersoll Rand enclosed rail systems

Rail Systems

Profiles

Quality steel and aluminum rail systems

Ingersoll Rand rails are available in two different materials and five different sizes to meet your specific material handling needs. The enclosed rail systems design reduces the accumulation of dirt and grime on the internal rolling surfaces, thus reducing rolling effort.

The Ingersoll Rand rail systems **ADVANTAGE**

- ▶ **Lightweight and ergonomic:** less than 1 percent rolling resistance
- ▶ **Modular and flexible:** bolted together; no welding required
- ▶ **Clean, maintenance-free operation:** no lubrication required
- ▶ **Safety:** designed to meet or exceed all national and international standards

Lightweight aluminum profiles

- ▶ Lightweight and available for long spans
- ▶ Extruded from aluminum
- ▶ Clear anodized for a smooth, clean, corrosive-free surface

Rugged steel profiles

- ▶ Roll formed from 9 gauge (4 mm), A569 hot-rolled steel
- ▶ Spot welded with automated welder for maximum strength
- ▶ Powder-coat painted for durability and smoothness

Advanced load trolleys

Ingersoll Rand trolleys are designed to work in conjunction with the enclosed track rail to reduce the rolling effort required to move a load. Only a force equal to 1 percent of the total rolling weight is needed when moving loads.

- **Lightweight:** trolleys are made from high-strength, lightweight aluminum castings
- **Injection molded wheels:** provide for clean, wear-free operation that resists flattening
- **Sealed precision bearings:** in wheels and side guide rollers, they provide long life and reduced maintenance
- **Rail safety lug:** prevents the body of the trolley from being pulled through the enclosed track rail
- **Versatile:** Ingersoll Rand-built trolleys are available for use in virtually every manufacturer's enclosed track rail system

Note: the ZRA1 monorails use the same components as the ZRA1 bridge cranes (hanger kits, load trolleys, etc), except dual hoist trolley, part no. 30303.

Rail Systems

While Ingersoll Rand offers both articulating and rigid end trucks to match the material handling application, the primary system sold utilizes the articulating end truck. This feature maximises the ability of the operator to precisely position loads, by allowing him to move only the portion of the bridge crane near the load. This results in dramatic improvements over typical rigid end truck systems, which require the user to move the entire mass of the bridge crane for each operation.

Ingersoll Rand offers a wide variety of hangers to attach to virtually any type of overhead steel. Available in either rigid (anti-compression) or pivoting styles to match the material handling operation, the hangers come in fixed or adjustable lengths for all rails.

Articulating end trucks

- Maximize the ability of the operator to precisely position the load
- Reduce fatigue by allowing the operator to move only the portion of the bridge crane near the load
- Dramatic improvements over typical rigid end-truck systems, which require the user to move the entire mass of the bridge crane for each operation

TIP

Load capacity:

To correctly calculate the load capacity of each component described in the previous pages, please apply the following rule of calculation:

$$A + B + (C:2).$$

A = Load to be moved

B = Balancer or hoist weight

C = Weight of the lower rails and trolleys divided by 2.

Power supply

Air supply kits:

- ▶ Available in both 3/8" and 1/2" to fit application needs
- ▶ Includes filter regulator to ensure clean regulated air supply
- ▶ Provides complete utilisation of the bridge and runway system

Jib Cranes

Solutions for compact workstations

Ingersoll Rand offers:

- ▶ 220° or 360° rotation
- ▶ Floor or wall mount
- ▶ Standard or low profile
- ▶ Capacities to 860 kg

Features

The Ingersoll Rand Jib Crane with a rail option use precision Ingersoll Rand Enclosed Track rail for the boom, resulting in an ergonomic, lightweight boom with best-in-class rolling resistance.

The Ingersoll Rand jib crane **ADVANTAGE**

- **Precision:** made from precision Ingersoll Rand aluminum rail, resulting in a lightweight, easy-to-move boom with low rolling resistance for smooth travel.
- **Ergonomic:** Ingersoll Rand aluminum rails offer less than 1% of rolling effort.
- **Cost Effective:** Jib cranes are an inexpensive solution for short transfer applications.

Boom length

- Radius of coverage area
- Most ergonomic operation is closer to end of boom

Boom underclearance

- Distance from floor to bottom of boom
- Available up to 4.27 m, 3.65 m standard

Overall height

- Distance from floor to top of jib crane
- 900J Series offers lowest overall height

Boom profile

- Clean, lightweight anodized aluminum

Note: for proper installation of a floor-supported jib crane system a minimum of a 15 cm thick reinforced concrete floor is required.
Consult a registered structural engineer before installing the jib crane.
This is required to ensure local building codes, possible seismic loading considerations and variance in concrete slab and soil conditions are addressed.

Electrification kit

Includes 2 suspension brackets, 1 anchor bracket, variable length tag line wire with clamps and eyebolt assembly, and cable trolleys.

Model no	Boom (m)
ZHS90090-1	Up to 4 m
ZHS90090-2	Greater than 4 m

Balancers

The strength behind Ingersoll Rand ergonomic handling

Ingersoll Rand offers:

- ▶ BW pneumatic balancers
- ▶ IntelLIFT® intelligent assist devices
- ▶ Mechanical spring balancers

BW-Series Pneumatic Balancers

Features

Meeting the needs of today's material handling applications requires an ergonomic lift assist that interacts with the operator. The balancer offers lifting solutions to meet these needs through float and built in safety features.

The Ingersoll Rand pneumatic balancer **ADVANTAGE**

- ▶ **Precise, strain-free positioning:** float leaves both hands free to raise, lower, or shift the load with virtually no resistance; no more "hoist control" hit-and-miss spotting.
- ▶ **Simple adjustment:** clear access to air-flow calibration controls allows quick, easy adjustment of the float.
- ▶ **Rugged reliability:** for continuous duty with minimal maintenance.

PLUS:

- ▶ **Low air consumption:** approximately 1/8 cfm required per cycle (one fiftieth of that of an air hoist) means very low energy costs.
- ▶ **Clean, oil-free operation:** pre-lubricated design eliminates air line lubrication and oil mist exhaust; ideal for food processing and clean manufacturing environments

Safety is standard

- ▶ Built-in overload protection: the lifted load can never exceed the unit's maximum rated capacity
- ▶ Minimal cable recoil due to loss of load: if the load is accidentally lost, a centrifugal brake (Z brake) automatically stops rapid upward cable travel

Versatile configuration

- ▶ Wide range of capacities up to 450 kg
- ▶ Added protection: the optional Z Stop offers protection against the drifting of loads in the event the main air supply is lost
- ▶ Cable travel 1 m to 3 m depending on the model
- ▶ Controls: ZA (pendant) controls let you handle varying loads; a BA (single) balance control is ideal for a constant load, and an EA for 2 loads
- ▶ Mounting: suspension kits for Ingersoll Rand and other enclosed track manufacturers as well as I-beam, patented track, and hook mount
- ▶ CE certification: meets the requirements for the European community

Z brake safety retraction system (patent no. 5,522,581): Standard on all units, prevents violent retraction in the event of a sudden release or loss of load. The brake will also eliminate excessive upward acceleration of a no load hook when the "up" button is pressed in fully.

Suspension lugs: Fits all Ingersoll Rand suspensions and most trolleys from other manufacturers.

Rugged steel housing: All steel housing for added durability

Injection-molded reel: Engineered plastic for excellent durability and wear resistance

Anti-friction ball screw: Creates smooth rotation path for the cable reel.

Heavy-duty thrust bearing: Absorbs piston force and transfers smooth reel rotation over the ball screw.

Low-friction cable guide (not shown): Ensures smooth cable feed on and off the reel.

Air chamber and piston: Forms the heart of the unit. Air entering the chamber pushes the piston to rotate the spool, wind the cable, and lift the load. Exhausting air lowers the load. Regulating this flow balances the load, creating a zero gravity float.

Z Stop:

The optional Z Stop is a patented device that will eliminate the down-drift of suspended loads or tools during shut down or at night when the air supply is shut off. The Z Stop will stop drift within 150 mm and put the Balance Air into a mechanically locked position preventing damage to tools or objects below the suspended load. Available for use on all 254 mm diameter units.

(1) Only for 50, 66, 82 and 100 mm beam widths.

Speed control kit, part no. 58267352

Regulates the inlet pressure of the balancer. Full control of lifting speed for any loads. Must be used with the ZA pendent control 15300. Specially designed for lightweight hook with heavy loads

Tri-Coil, Quad-Coil and Interlock options

TRI-COIL

Part no.
15300-TC-NH
Specially designed to integrate a mechanical handling device with an up and down control.

TRI-COIL + Interlock

Part no.
15300-TC-I-NH
Specially designed to integrate a simple handling device. Incorporates the Interlock safety device.

QUAD-COIL

Part no.
15300-QC-NH
Specially designed to integrate a pneumatic powered handling device (3rd air supply tube).

QUAD-COIL + Interlock

Part no.
15300-QC-I-NH
Specially designed to integrate a pneumatic powered handling device (3rd air supply tube). Incorporates the Interlock safety device.

BW-Series Pneumatic Balancers

Dimensions

BAW 0.9 - 22 kg air positioner

This air unit offers an incredible 0.9 to 22 kg load capacity and our exclusive flotation feature.

Standard features:

- **Performance:** float action provides ease of vertical travel, eliminating tension on load, making positioning capability far superior
- **Versatility:** no need to change model when making tool change; one model (BAW005060) covers entire 22 kg range
- **Headroom:** requires only 511 mm from bottom of rail to bottom of hook
- **Adjustment:** simple adjustment in seconds by means of external regulator
- **Sequencing:** can be sequenced via air signal to perform timed or "stepped" operation
- **Maintenance:** virtually maintenance-free. Normal maintenance can be done in place on the rail

Model no.	Load capacity (kg)	Lifting travel (m)	Body diameter (mm)	Weight (kg)
BAW005060	0.9 - 22	1.5	260	9.0

New

Now available with ergonomic up/down pendant control for high speed precise positioning

Model no. **ZAW005060HM-TC**

IntelLIFT® Series Balancers

Intelligent lifting system

IntelLIFT® is an intelligent assist device (IAD); it converts intuitive operator input into smooth, effortless up / down motion. The force-sensing control handle responds to operator input quickly and seamlessly for precise positioning of loads.

The Ingersoll Rand IntelLIFT Balancer **ADVANTAGE**

- ▶ **Self-balancing:** intuitive speed control for different weights
 - ▶ **Hands-on maneuvering:** IntelLIFT senses force input of the user and translates that to assisted lifting / lowering of the load without the need for up / down buttons
 - ▶ **Float mode:** throughout entire range of motion
 - ▶ **Robust design:** electric over air design allows continuous duty with minimal maintenance
 - ▶ **Part present:** eliminates potential to accidentally drop part
 - ▶ **3-Speed select:** enables speed selection to match application and operator comfort level
- Same green features as the Pneumatic Balancer**
- ▶ **Low air consumption**
 - ▶ **Clean, oil-free operation**

Integrated IntelLIFT® control module

- ▶ Integral element of the balancer itself
- ▶ Simple programming of functions with a keypad and indicator lights
- ▶ Easy-to-read display window

Ergonomic control handle

- ▶ Emergency stop/power off
- ▶ Power on
- ▶ Up / down rocker switch
- ▶ IntelLIFT feature selection button
- ▶ 3-speed select button
- ▶ Clamp button for handling device integration
- ▶ Ergonomic handle

"Universal hook".
Common mounting
interface for handling
device

Control options

IB

IntelLIFT® basic unit, without control

Features:

- ▶ No controls
- ▶ Standard InteLIFT features

Suitable for:

- ▶ Integration with end effector

IA

IntelLIFT® with pendant control and pre-coil cable

Features:

- ▶ IntelLIFT ergonomic pendant control handle with up/down rocker switch
- ▶ Precise, high-speed positioning
- ▶ 3.7 m twin bonded pre-coil cable including pre-coil air hose for handling device integration

Suitable for:

- ▶ Pick and place
- ▶ Precision assembly
- ▶ Floating capacity

IC

IntelLIFT® with force-sensing control (without up/down buttons)⁽¹⁾

Features:

- ▶ IntelLIFT ergonomic force-sensing control handle
- ▶ Intuitive up/down control
- ▶ 3.7 m twin bonded pre-coil cable including pre-coil air hose for handling device integration

Suitable for:

- ▶ High-cycle pick and place
- ▶ Precision assembly
- ▶ Multiple load capacity

IS

IntelLIFT® with pendant control and straight cable

Features:

- ▶ IntelLIFT ergonomic pendant control handle with up/down rocker switch
- ▶ Precise, high-speed positioning
- ▶ 3.7 m straight electric cable

Suitable for:

- ▶ Pick and place
- ▶ Precision assembly
- ▶ Floating capacity

(1) IC control option includes force sensing load cell which must be mounted to end effector for proper operation

IntelLIFT® integrated solutions

A complete range of end effectors can be used with IntelLIFT controls for greater efficiency, from the simplest to the most complex device.

The IntelLIFT unit incorporates a fully grounded, fault-protected electrical system, with fused circuits and memory that automatically reinstates function selections following a power interruption. In every respect, the Ingersoll Rand IntelLIFT air balancer is an essential solution for a more productive workplace; empowering individuals to work comfortably and effectively, significantly contributing to product and process quality.

The closed-loop feedback system delivers precise, responsive motion control suitable for a wide range of applications in:

Vehicle assembly

General industry

Beverage and warehouse

Biotechnology

Electronics

Aerospace

IntelIFT® Series Balancers

IntelIFT® integrated solutions

The engine-handling device shown uses the unique features of the IntelIFT balancer. Features include: auto clamp, interlock, up control disable, weight sensing with automatic alarm, and keyed lockout.

Error-proof assembly:

The device digitally displays the weight of the part picked up. Device will not allow the operator to move the part if not clamped properly. The key allows the operator the ability to lock the device. Allows 100 percent visual inspection of the assembly.

The warehouse-handling device shown is known for its versatility. The device mimics the human motion of picking up a part and placing it down. The same device can be used to pick up parts such as totes, trays, boxes, and milk crates. The self-balance feature allows the same device to pick up parts of different weights and sizes.

B-Series Spring Balancers

Features

B-Series spring balancers compensate weight of your power tools or other manufacturing equipment and enable operator to lift or lower it with minimal effort. Series BIDS, BHD and BSD(L) feature “Zero Gravity” effect allowing virtually effortless load repositioning all along cable travel.

The Ingersoll Rand spring balancer **ADVANTAGE**

- ▶ **60 models** from which to choose
- ▶ **Five different series** to meet all balancing requirements
- ▶ Covers weight-balancing needs from **0.4 to 180 kg**
- ▶ Lifts ranging from **1.6 to 3 m**
- ▶ **“Gravity-free”** effect on intermediate, heavy, and super-duty models allows user to move tool with minimal effort
- ▶ Made of **rugged** die-cast aluminum
- ▶ **Safety locking device** on medium, heavy, and super-duty models prevents dropping of the tool should the spring fail
- ▶ **Easy-to-use controls** allow for accurate spring adjustment

Balancers product information

Standard equipment / Series	BLD Series	BMD Series	BIDS Series	BHD Series	BSD(L) Series
Stainless steel cable and anti-friction cable guide	•	•	•	•	•
Auxiliary safety suspension	•	•	•	•	•
Adjustable stroke limiting device	•	•	•	•	•
Inert spring drum assembly	•	•	•	•	•
Adjustable capacity (by means of a worm screw for BIDS, BHD & BSD Series)	•	•	•	•	•
Rotary load hook	—	—	Option: OPTRI		
Automatic safety brake acting in case of spring breakage	—	•	•	•	•
Top shackle for increased convenience (1)	•	•	—	—	—
Rotary upper suspension with safety hook on ball bearing	—	—	•	•	•
Locking device to block the load at any height	—	• / —	•	•	•
Tapered drum rotating on ball bearings for zero gravity effect	—	—	•	•	•
Optional floor control locking	—	—	—	BIL-7343	BIL-3224

1) For retrofit or replacement use BIL-23223 for BLD Series, and BIL-23224 for BMD Series (BMDS, BMDLN and BMDLLN).

Options

For rotating bottom hook, please order part no. OPTRI to install it on BIDS balancers. For BHD and BSD(L) Series, amend balancer part no. with “OPTRI”

Locking/unlocking device for control from the floor:
Part no. BIL-7343 (for BHD Series).
Part no. BIL-3224 (for BSD and BSD(L) Series)

(1) Locking type balancer: sharp pull on the wire rope will lock it in position allowing attached load to be manipulated freely – without weight compensation. Pulling again will unlock the wire rope and resume weight compensation.

BMDS, BMDLN and BMDLLN

BIDS and BHD

BSD and BSDL

Arm Systems

Great for reaching in, under and around obstacles to precisely and effortlessly position loads

Ingersoll Rand offers:

- ▶ Column or overhead mounting options
- ▶ Three styles: articulating, parallel link, and vertical mast
- ▶ Up to 3 m of horizontal reach
- ▶ Capacities up to 225 kg

The Ingersoll Rand arm system

ADVANTAGE

- ▶ **Ergonomic reach:** prevents the need for operator to bend and reach into tight areas causing injury
- ▶ **Precise, strain-free positioning:** float leaves both hands free to raise, lower or shift the load with virtually no resistance
- ▶ **Versatility:** three styles available to fit a diverse set of applications in nearly any industry
- ▶ **Rugged reliability:** continuous duty with minimal maintenance
- ▶ **Integrated air supply:** prevents tangling of air lines running to below-the-hook handling devices

Parallel link arms

Parallel link arms utilize an air cylinder with a parallel link structure for lifting / lowering, making them ideal for reach-in applications.

Features:

- ▶ Capable of handling offset loads
- ▶ Column or carriage mount
- ▶ Optional brakes and limit switches available

Note: parallel link-style arms are designed to specific customer requirements. Contact factory for more information.

600 Series arms

600 Series arms utilize a rigid mast to guide the lifting / lowering, which is done by an integrated air balancer.

Features:

- ▶ Capable of handling offset loads
- ▶ Carriage mount compatible with most rail systems
- ▶ Up to 1.5 m vertical travel and 160 kg capacity
- ▶ Includes integrated air balancer

700 Series articulating arms →

700 Series arms combine the benefits of an air balancer with the flexibility and reach of an articulating arm.

Features:

- ▶ Column, ceiling, or carriage mount
- ▶ Up to 3 m horizontal reach and 225 kg capacity
- ▶ Includes integrated air balancer available in rear-mount, mid-mount and front-mount configurations.

Bumper friction brake	B	54039730	—

(1) Dimension is from the rail running surface to the base of the pivot. Changes with brake option

Note: lightweight ALMAG casting. Carriage weighs 27.3 kg.

700C Series arms

Top-mount 700C arm shown

Features:

- ▶ Rear-mount balancer offers lowest rotational inertia of all models
- ▶ Short stack-up for low headroom applications
- ▶ Two-point pivot providing 270° articulation
- ▶ Carriage or column mount
- ▶ Arm lengths of 1.8 m, 2.1 m, 2.4 m, 2.7 m and 3 m available
- ▶ Integrated 68, 90, 160, or 225 kg air balancer (@ 700 kpa, see page 21 for details)

Arm Systems

700 Series arms options and accessories

Mounting accessories

Symbol	Description
A	Overhead mount column 333 mm tall (for use with ceiling-mounted arms)
B	Column, 2.44 m tall
C	Column, 2.60 m tall
D	Column, 2.75 m tall
E	Column, 3.05 m tall
F	Column, 3.35 m tall
G	Column, 3.65 m tall

Carriages

Symbol	Description	Part no.
NT	Carriage – basic, no trolleys	40710
TR	Carriage assembly – T-rail / I-beam	40709
A2	Carriage assembly – ZRA2 (reaction trolley)	30028-1
S2	Carriage assembly – ZRS2 / ZRS3	30028-2
A1	Carriage assembly – ZRA1	30028-3
E8	Carriage assembly – ETA-8 (reaction trolley)	30028-4
K2	Carriage assembly – KBK2	30028-5

Note: lightweight ALMAG casting. Basic carriage weighs 27.3 kg.

(1) **Note:** shown in low profile set-up.

A = 13 mm bolts (6), holes on a 190 mm bolt circle

Controls

Symbol	Description
ZP	ZA up / down pendant control
ZQ	ZA up / down pendant control with Quad-Coil
ZT	ZA up / down pendant control with Tri-Coil
BA	BA single balance control (only for use on 68 kg capacity units)
BZ	BA Z-servo, single balance control
EP	EA 2PS pressure, load / no-load balance control for use with clamp devices
EV	EA vacuum, load / no-load balance control for use with vacuum devices

			E8 = Carriage - ETA8 (reaction trolley)				G = 3.65 m column
			K2 = Carriage - KBK2				

(1) A1 carriage mount option is only available for arms with less than 90 kg capacity and less than 2.44 m arm length.

Handling Devices

Made for the interaction of man and machine

Ingersoll Rand offers:

- ▶ Standard and custom solutions
- ▶ Manual and powered tilt and rotation packages
- ▶ Innovative designs from the simplest to the most complex device

Handling Devices

The Ingersoll Rand handling device **ADVANTAGE**

- ▶ **Safety:** most Ingersoll Rand handling devices come equipped with a safety interlock system that will not allow the operator to accidentally disengage the part during transfer
- ▶ **Ergonomics:** handling devices can be designed with manual or powered tilt and rotation packages, which allow the operator to orient the part to the proper position with minimal effort
- ▶ **Flexibility:** through a variety of pneumatic packages, each system is matched to a control package that is tailored to the lifting and positioning task

Standard 4-cup vacuum handling device

- ▶ Safety Interlock prevents accidental release of load
- ▶ Improve productivity through effective box or flat part pickup, orientation, transfer, and positioning
- ▶ Adjustable handle and controls reduce operator fatigue
- ▶ Protects surface quality with positive secure vacuum gripping and setdown
- ▶ Gives operator complete control throughout the handling operation

Model no.	Cup centerline dimensions (mm)	Lift capacity		Cup diameter (mm)
		Vacuum (hPa)	@ 6.9 bar (100 psi)	
87306338	127 x 178	200 (porous)	20 kg	76
		610	44 kg	76
		850 (non-porous)	54 kg	76
87306486	254 x 356	200 (porous)	20 kg	76
		610	44 kg	76
		850 (non-porous)	54 kg	76

To be used with "BW" series pneumatic balancers. Alternate layout and vacuum cup sizes available on request
Note: vacuum cups require a flat, non-porous surface. Consult factory for applications with porous surfaces.

Vacuum handling device

Model no.	Description
ZV1S	1-Cup handling device
ZV1ST	1-Cup handling device with tilt
ZV4S	4-Cup handling device
ZC2S	Standard clamp device

Signature bundle handlers

- ▶ Designed to meet the needs of the printing industry in handling logs from 55 cm to 122 cm and up to 110 kg
- ▶ Single (250 mm stroke) and dual (760 stroke) air cylinders with 400 kg clamping force at 6.2 bar (90 psi)
- ▶ Safety interlock prevents accidental release of load
- ▶ Standard paddles for end boards up to 305 mm x 305 mm (extended paddle configurations available — contact factory)
- ▶ Power rotation and self-leveling packages available. Contact factory for further information
- ▶ Lightweight aluminum construction

Single cylinder with top swivel handle control

Dual cylinder with top swivel handle control

Dual cylinder with side control

Model no.	Body style	Control type	Bundle size (mm)	Stroke (mm)
SBH1-1-1	Single cylinder	Single side control	610-813	254
SBH1-2-1		Dual side control		
SBH1-3-1		End control		
SBH1-4-1		Side and end control		
SBH1-5-1		Top swivel handle control		
SBH1-1-2	Single cylinder	Single side control	813-1016	254
SBH1-2-2		Dual side control		
SBH1-3-2		End control		
SBH1-4-2		Side and end control		
SBH1-5-2		Top swivel handle control		
SBH1-1-3	Single cylinder	Single side control	1016-1219	254
SBH1-2-3		Dual side control		
SBH1-3-3		End control		
SBH1-4-3		Side and end control		
SBH1-5-3		Top swivel handle control		

Consult factory for applications that require greater than 254 mm stroke, dual cylinder available.

Handling Devices

Rotary action handlers

- ▶ Provides effortless 90 degree manual rotation of rolls up to 135 kg
- ▶ Non-destructive rubber band style as well as pin style noses engage the ID of the core
- ▶ Safety interlock prevents accidental release of load
- ▶ Offered in both lightweight aluminum and rugged steel construction
- ▶ Integrated up/down controls work seamlessly with Ingersoll Rand pneumatic balancer

Effortless horizontal to vertical rotation

Body selection chart

Body material	Capacity (kg)	Max. core length (mm)	Max. core O. D. (mm)
Aluminum	45.4	305	762
Steel	136.1	310	1067

Nose selection chart

Nose style	Capacity (kg)
3 Pin	45.4
6 Pin	163.1
Single band	90.7
Double band	136.1

Band nose

Pin nose

Custom power tilt

- ▶ Other options available upon request:
- ▶ Stepped nose for multiple cores
- ▶ "V" groove for pin cart applications
- ▶ Special paint / plating
- ▶ Spindle end locator
- ▶ Adjustable bail
- ▶ Heavy duty pivot for steel rotary action handler offers capacity up to 200 kg

Stepped nose

Rotary Action Handler model driver – Example: RAHA020030TP

Device type	Body material	Core I.D.		Core length		Nose style	Options
RAH = Rotary action handler	A = Aluminum	075 = 75 mm	020 = 2"	030 = 3" (76 mm)	070 = 7" (178 mm)	T = 3 Pin	P = Part present
	S = Steel	094 = 94 mm	030 = 3"	035 = 3.5" (89 mm)	075 = 7.5" (190 mm)	S = 6 Pin	C = Side clamp (available only w/ steel body)
		110 = 110 mm	040 = 4"	040 = 4" (102 mm)	080 = 8" (203 mm)	B = Single band	I = Interchangeable nose w/ quick-release pins
		140 = 140 mm	050 = 5"	045 = 4.5" (114 mm)	XXX = Length (to be specified. 12" Max. for aluminum, 24" Max. for steel)	D = Double band	
		143 = 143 mm	060 = 6"	050 = 5" (127 mm)			
			080 = 8"	055 = 5.5" (140 mm)			
				060 = 6" (152 mm)			
				065 = 6.5" (165 mm)			

To be used with "BW" series Pneumatic Balancers.
Consult factory for applications with rolls prone to telescoping.

Handling Devices

Custom devices

Ingersoll Rand is a world leader in the manufacture of ergonomic, in-process, manual and powered custom material handling systems. We offer a complete range of handling devices, from the simplest to the most complex custom device. We specialize in providing turnkey solutions utilizing our complete line of standard and custom products to create a combination that empowers individuals to work more comfortably and effectively.

Motor vehicle

Agricultural equipment

Furniture / household

CLAMP

Cheese — food processing

HOOK / TRAP

Gaming table

VACUUM

Box — general industry

PROBE

Steel roll

Box — general industry

Beverage handling

Toilet tank

Ceramic steel funnel

Floor scrubber

Vehicle transmission

Glass

HVAC — copper coil

Torque Tube

The Ingersoll Rand torque tube **ADVANTAGE**

- **Guided lifting:** cylinder guides up/down motion, preventing load from swinging
- **Effortless vertical travel:** super linear bearings provide smooth, effortless motion
- **Versatility:** four models available for both torque reaction and lifting applications
- **Torque reaction:** 4 Delrin® wheels for torque reaction and side loading in all four directions
- **Adaptable:** universal mounting plate for bolt-on integration of tool holders and handling devices

Torque tube with integrated vacuum handling device

Torque tube models

Model no.	Description	Torque capacity (Nm)	Lift capacity at 6.9 bar (kg)	Weight (kg)	Travel (mm)	Control
54044227	IRZ-TT-100	100	27	18	508	BA regulator
54041819	IRZ-TT-250	250	27	23	610	BA regulator
54044417 (1)	IRZ-TT-500	500	45	34	914	BA regulator
45621109 (1) (2)	IRZ-ZA-500	500	45	36	914	ZA up/down

(1) Carriage mount option only.

(2) Accommodates offset loads to 24" (609 mm). Consult factory for special applications.

Optional cylinder air supply

Part no. 90050. Cylinder air supply package. Includes regulator assembly and all required hose fittings to supply cylinder.

Suspension kit, single trolley

Suspension kit, dual trolley

Suspension kit options – single and dual trolleys

Model no	Rail profile	"A" Dimension (mm)	Weight (kg)
Single trolley – Used for 80 Nm or less applications			
16610	ZRA2	120	2.0
16600	ZRAS2/3	120	2.0
16615	KBK-II/IIL	120	2.0
16635	ETA-8	120	2.0
16620	T-Rail	76	6.8
Dual trolley – Up to 150 Nm applications			
16755	ZRAT	165	4.8
16705	ZRA1	156	4.8
16710	ZRA2	172	4.8
16700	ZRAS2/3	172	4.8
16725	KBK-I	156	4.8
16715	KBK-II/IIL	172	4.8
16744	ETA-4	156	4.8
16735	ETA-8	172	4.8

Note: for use on torque tube part no. 54044227 and 54041819.

(1) **Note:** shown in low profile set-up.

A = 13 mm bolts (6), holes on a 190 mm bolt circle

Carriage options

Model no.	Description
40710	Carriage — basic, no trolleys
40709	Carriage assembly — T-rail / I-beam
30028-1	Carriage assembly — ZRA2 (reaction trolley)
30028-2	Carriage assembly — ZRS2 / ZRS3
30028-3	Carriage assembly — ZRA1
30028-4	Carriage assembly — ETA-8 (reaction trolley)
30028-5	Carriage assembly — KBK2

Note: for use on part no. 54044417 and 45621109

Lightweight ALMAG casting. Basic carriage weighs 27.3 kg

Each carriage drawing has info for both high and low profile assemblies

Other Products from Ingersoll Rand

Assembly Solutions

Ingersoll Rand offers a full line of production fastening equipment, including DC electric fastening systems and air assembly tools in a broad range of configurations. See our website ingersollrandproducts.com

Industrial Lifting Equipment

Our range of industrial lifting equipment comprises air hoists and hoist-trolley combinations with load capacities from 250 kg to 50 ton — Control through pilot pendent for very precise positioning. See our website ingersollrandproducts.com

Ingersoll Rand (NYSE:IR) advances the quality of life by creating and sustaining safe, comfortable and efficient environments. Our people and our family of brands — including Club Car®, Ingersoll Rand®, Schlage®, Thermo King® and Trane® — work together to enhance the quality and comfort of air in homes and buildings; transport and protect food and perishables; secure homes and commercial properties; and increase industrial productivity and efficiency. Ingersoll Rand products range from complete compressed air systems, tools and pumps to material handling systems. The diverse and innovative products, services and solutions enhance our customers' energy efficiency, productivity and operations. We are a \$14 billion global business committed to a world of sustainable progress and enduring results.
